PROGRAM NOTES

Early on the morning of December 17, 1903, the wind conditions were perfect for the first powered flight of the Wright Brothers, Wilbur and Orville. Depicted in the opening of "Into The Air!", powered by the clarinet section, the consistent winds were blowing across the North Carolina beaches and hills. As Orville piloted the first powered airplane, the flight lasted 12 seconds in the air and 20 feet off the ground. The brothers taking turns in piloting the plane, had a total of 4 flights made before the out of control winds took the plane into a crushing whirlwind. The final flight of the day lasted an impressive 59 seconds. The composition continues to grow in each section, just as the two brothers continued to take turns and go longer and higher with each flight to follow.

Significant measures are marked to commemorate, not only the "100th Anniversary" of this historic day, but also remembering the 4 flights, 12 seconds in the air, 20 feet off the ground, and the ending imagining the demise of the historic plane itself. I hope you enjoy with great imagination as the Wright Brothers go INTO THE AIR! -LJK
